Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the current state of the art as exemplified in the teachings of anyone of Klein et al (US 4,779,762; abstract; col. 1 line 13 to col. 2 line 13; claim 1), Price et al (US 4,396,529; abstract, col. 3 line 47 to col. 8 line 29, particularly col. 4 lines 17-19; figures 1-4) and Wydro et al (US 4,405,063; abstract; claim 1).

The intended use recited in the preamble of claim 1 was not given very little (if any) patentable weight.

Allowable Subject Matter

3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter:

There is no suggestion in the prior art references to spray gas and gluing substance together to form a homogenous mixture before the gluing substance is foamed. While Price et al teaches blending liquid resin and gas together in a

mixing chamber of a foamable adhesive applicator by injecting radially several gas into a liquid stream (col. 4 line 6 to col. 5 line 3; col. 7 line 56 to col. 8 line 29; figures 2 & 4), there is no suggestion whether the liquid stream and the injected gas are sprayed together as required in these claims. Moreover, while it is known in the art to form a liquid/foam dispenser, where a flowing liquid/foam stream from a nozzle is aerated by transversely blowing a plurality of air to the stream as exemplified in the teachings of Hull et al (US 5,645,223; col. 2 line 5 to col. 3 line 65; figures 1-2), there is also suggestion to spray a liquid and gas before foaming.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
